

RAJAGIRI JEEVASS CMI CENTRAL SCHOOL, ALUVA

ESO CLUB

PROTECTING OUR ENVIRONMENT

ABOUT US

Protecting our environment underpins our economy, our society, and indeed our very existence. ESO club educates, inspires, and sensitizes the students on various environmental issues, conservation approaches, sustainable utilization of natural resources, and their management to create a positive influence between nature, man, and the environment.

OBJECTIVES

- To create a love and responsibility for nature.
- To enable students to take up activities in the real world.
- To motivate the students to keep their surroundings green and clean by undertaking the plantation of trees.
- To create awareness of biodiversity conservation and local environmental issues among schoolchildren.
- To create awareness about the dangers of pollution.

Paper plates made for sports day snack stall by the students.

Bag making with eco-friendly materials as part of closing ceremony.
Date: 22nd February 2024 Time: 1:00pm – 2:00pm Venue: VIII B & VIII C

Voices from the ESO Club

Ananthkrishnan VIII A

“Being a member of the ESO club has changed me a lot. As a student who never used to care about nature, the PPT presentations and informative talks in each club meeting made me understand the importance of preserving nature and the consequences the world has to face if we continue to destroy it. I changed my lifestyle because of the influence. I started by watering the plants in my home first thing in the morning. I started to conserve water. The club changed me from being a person who never bothered about nature to being a nature lover who tries to protect nature at all costs.”

Alyssa Brinda Dinu VII A

“I was a member of the ESO 2023-24. It was an unforgettable experience as I got the chance to make new friends and share a great bond with our teachers. Being a member helped me develop many values like teamwork, listening skills, kindness, etc. These values will be helpful in my future. I enjoyed all the activities, and above all, it motivated me to keep our environment clean and get closer to our mother nature. In conclusion, I loved being a part of this organization and would still look forward to being a part of it.”

Silan Santo VII A

“I joined the ESO Club and found lots of fun things to do. It changed how I live. Now, I can reuse pens to make cool pen holders. As part of nature conservation, I started not throwing away chocolate wrappers after I used them. This year, being part of the ESO Club was an incredible experience.”

Frederick John VIII A

“Engaging with the ESO club was an eye-opening journey. The club showcases the remarkable potential hidden within what others might think of as waste. Through our innovative projects, crafting paper bags from old newspapers and transforming used pens into vibrant pen stands, we have demonstrated the beauty that can emerge from the seemingly routine. These creations are more than just practical symbols of sustainability and our belief in the transformative power of creativity. By showcasing these repurposed treasures, we inspire others to rethink their relationship with waste and highlight the endless possibilities for crafting beauty from the discarded. In the ESO club, we discovered that every piece of waste holds the potential for a new beginning, and by harnessing our creativity, we can turn ordinary things into extraordinary.”
